Mark scheme
June 2021
Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

## Copyright information

AQA retains the copyright on all its publications. However, registered schools/colleges for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to schools/colleges to photocopy any material that is acknowledged to a third party even for internal use within the centre.

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

M Method marks are awarded for a correct method which could lead to a correct answer.

A Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied.

B Marks awarded independent of method.
ft Follow through marks. Marks awarded for correct working following a mistake in an earlier step.

SC Special case. Marks awarded for a common misinterpretation which has some mathematical worth.

M dep A method mark dependent on a previous method mark being awarded.

B dep A mark that can only be awarded if a previous independent mark has been awarded.
oe $\quad$ Or equivalent. Accept answers that are equivalent. eg accept 0.5 as well as $\frac{1}{2}$
[a, b] Accept values between a and b inclusive.
[a, b) $\quad$ Accept values $\mathrm{a} \leq$ value $<\mathrm{b}$
3.14... Accept answers which begin 3.14 eg 3.14, 3.142, 3.1416

Use of brackets It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a student has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the student. In cases where there is no doubt that the answer has come from incorrect working then the student should be penalised.

## Questions which ask students to show working

Instructions on marking will be given but usually marks are not awarded to students who show no working.

## Questions which do not ask students to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Students often copy values from a question incorrectly. If the examiner thinks that the student has made a genuine misread, then only the accuracy marks (A or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that it is clear to the examiner that the student intended it to be a decimal point.

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | 16 | B1 |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{2}$ | $y=x+3$ | B1 |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{3}$ | $\frac{3}{20}$ | B1 |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{4}$ | $2 s+2 w$ |  | B 1 |

| Q | Answer ${ }^{\text {a }}$ Mark |  | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 6(a) | $\frac{9}{16}$ | B1 | oe fraction, decimal or percentage eg 0.5625 or $56.25 \%$ |  |
|  | Additional Guidance |  |  |  |
|  | Ignore incorrect simplific fraction, decimal or pe <br> eg1 $\frac{9}{16} \quad 0.55$ <br> eg2 $\frac{9}{16} \quad 9: 16$ | rsion of a ratio | correct probability to a | B1 B0 |
|  | Ignore words alongsid <br> eg1 $\frac{9}{16}$ unlikely <br> eg2 9 out of $16 \frac{9}{16}$ | ability |  | B1 B1 |
|  | Do not accept answer eg 9 out of 16 | ras a |  | B0 |

| Q | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 6(b) | Linear scale starting at 0 and increasing in 1s or 2s on vertical axis <br> Vertical axis labelled frequency or $f$ or Number or How many <br> Bars or horizontal axis labelled with four types of juice (accept A, G, O, M) <br> Four bars with equal widths <br> Equal gaps or no gaps between the four bars <br> All four heights correct | B3 | bar chart could be horiz bars may be in any ord <br> B3 for all criteria met <br> B2 for 4 or 5 criteria m <br> B1 for 3 criteria met or a fully correct 2-bar | chart |
|  | Additional Guidance |  |  |  |
|  | Mark intention throughout |  |  |  |
|  | If axes and labels do not match the criteria 4, 5 and 6 may be awarded | ntatic | the bar chart then only | B1 max |
|  | All values not needed for axis scale spacing must be linear | or exa | 0 can be implied, but |  |
|  | Allow words after 'Number' on axis 'Number of people' | el, eg ، | mber chosen' or |  |
|  | Condone a different gap between th the other, equal gaps | vertical | is and the first bar to |  |
|  | If no scale or a non-linear scale is $g$ squares meet the height criterion | n, bar | heights $6,1,4,5$ |  |
|  | Allow heights criterion if their height linear scale and it is linear between | match <br> and 6 | labels for their non- |  |
|  | Points only or vertical lines can scor | he mar | for criteria 1, 2, 3 and 6 | B2 max |

| Q | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 7 | $10.74 \div 6 \times 11$ <br> or <br> 1.79 seen | M1 | oe eg $2 \times 10.74-10.74 \div$ |  |
|  | 19.69 | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | $6 \div 10.74=1.79$ (recovered) |  |  | M1 |
|  | $6 \div 10.74$ |  |  | M0 |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{8}$ | 240 | B1 |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| 9 | Two multiples of 9 with a difference of 54 <br> eg 9 and 63 <br> or 18 and 72 <br> or 27 and 81 <br> or 36 and 90 <br> or 45 and 99 <br> or 54 and 108 | B2 | either order <br> B1 at least one multiple of 9 other than 9 or 54 seen <br> or two numbers with a difference of 54 |
|  | Additional Guidance |  |  |
|  | $11 \times 9=99,5 \times 9=45$, Answer 11 |  | B1 |

| Q | Answer | Mark | Comme |
| :---: | :---: | :---: | :---: |
| 10 | $11.2 \div 8 \times 5$ <br> or 1.4 seen <br> or 1.6 seen <br> or 0.625 seen | M1 | oe full method <br> oe eg $\frac{7}{5}$ <br> oe eg $\frac{8}{5}$ <br> oe eg $\frac{5}{8}$ |
|  | 7 | A1 |  |
|  | Additional Guidance |  |  |
|  | Build up methods may score for seeing the correct scale factor ie 1.6 or 0.625 but otherwise need a fully correct method for the first mark |  |  |
|  | Build up methods that do not reach exactly 7 but are then rounded to 7 will score M1 max for seeing 1.4, 1.6 or 0.625 |  |  |
|  | M1 may be awarded for correct work, with no or incorrect answer, even if this is seen amongst multiple attempts |  |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| 12(a) | 20 home and 20 away | B1 |  |
|  | 8 home losses | B1ft | ft their $20 \times \frac{2}{5}$ rounded to the nearest whole number |
|  | 2 away wins | B1ft | ft their $20 \times \frac{1}{10}$ rounded to the nearest whole number |
|  | 5 home draws and 6 away draws | B1ft | ft their 8 and their 2 <br> condone their 8 and their 2 as zero or non-integers <br> award if total of home games is their 20 and total of away games is their 20 and total number of games is 40 |
|  | Additional Guidance |  |  |
|  | Mark the cells in the fre |  |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| 12(b) | Any two of (home wins =) $7 \times 6$ or 42 or (home draws =) their $5 \times 3$ or 15 or (away wins =) their $2 \times 6$ or 12 or (away draws =) their $6 \times 3$ or 18 | M1 | may be implied by one of (total points for their wins) 54 or (total points for their draws) 33 or (total points for their home) 57 or (total points for their away) 30 |
|  | 87 | A1ft | ft their frequency tree with positive integers in all relevant sections |
|  | Additional Guidance |  |  |
|  | Using non-integers |  | MOAO |

|  | $\begin{aligned} & 4 \div 3 \times 15^{3} \times \pi \text { or }[4488,4500] \pi \\ & \text { or }[14092,14139] \end{aligned}$ | M1 | oe allow 1.33 or better |  |
|  | [ 58,60$] \times 160$ or [9280, 9600] | M1 | oe |  |
|  | $\begin{aligned} & \text { their }[9280,9600]+5000 \\ & \text { or }[14280,14600] \end{aligned}$ | M1dep | dep on 2nd M1 |  |
|  | $\text { [14092, } 14139]$ <br> and [14280, 14600] and Yes | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Accept $\frac{4}{3} \pi 15^{3}$ without multiplication signs |  |  |  |
|  | Condone use of 1.3 for up to M3 if 1.3 shown |  |  |  |
|  | Up to M3 may be awarded for correct work, with no or incorrect answer, even if this is seen amongst multiple attempts |  |  |  |
|  | Using an incorrect power eg $15^{2}, 15 \pi^{3},(15 \pi)^{3}$ or omitting $\pi$ unless recovered |  |  | 1st M0 |
|  | NB 56.(59...) or 56.6 or 57 coming from $5000 \div 88.35 \ldots$ |  |  | M1M1M0 |
|  | Yes can be implied eg Alt $157<60$ |  |  | M3A1 |

| Q | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 28 | Sometimes true <br> Always true <br> Always true <br> Never true | B4 | B1 for each |  |
|  | Additional Guidance |  |  |  |
|  | Allow any unambiguous indication eg all 4 correct boxes contain a cross with all other boxes blank |  |  | B4 |
|  | A row with one tick and some crosses - mark the tick |  |  |  |
|  | A row with more than one tick is B0 for that row |  |  |  |
|  | Mark the boxes not the working lines |  |  |  |

| Q | Answer | Mark | Com |
| :---: | :---: | :---: | :---: |
| 29(a) | Any one of <br> 0.24 or 0.19 or 0.22 <br> in the correct cell | M1 | oe fraction, decim eg $\frac{36}{150}$ or $\frac{38}{200}$ <br> implied by any corr three values |
|  | At least two of their relative frequencies plotted accurately | M1dep | $\pm \frac{1}{2}$ square |
|  | $(150,0.24),(200,0.19)$ <br> and (250, 0.22) plotted <br> and graph completed with straight lines | A1 | $\pm \frac{1}{2}$ square <br> allow dotted or solid |
|  | Additional Guidance |  |  |
|  | Mark intention for straightness of lines |  |  |
|  | Ignore any continuation of line after the last point or any other lines drawn on the graph, for example a line of best fit |  |  |

| Q | Answer | Mark | Comme |  |
| :---: | :---: | :---: | :---: | :---: |
| 29(b) | 0.22 | B1ft | oe fraction, decimal or percentage <br> eg $\frac{55}{250}$ <br> ft their relative frequency for 250 trains ( $>0$ and $<1$ ) given in table or plotted on graph |  |
|  | Additional Guidance |  |  |  |
|  | The mark may be awarded for a correct restart or a follow through from their table or a follow through from their graph |  |  |  |
|  | Ignore attempts to convert a correct relative frequency once seen in (b) |  |  |  |
|  | NB $\frac{166}{750}=0.2213 \ldots$ is incorrect (unless it is given as their relative frequency for 250 trains) |  |  | BOft |
