# GCSE <br> MATHEMATICS <br> 8300/1F 

Foundation Tier Paper 1 Non-Calculator
Mark scheme
June 2021
Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

M Method marks are awarded for a correct method which could lead to a correct answer.

A Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied.

B Marks awarded independent of method.
ft

SC

M dep A method mark dependent on a previous method mark being awarded.

B dep A mark that can only be awarded if a previous independent mark has been awarded.
oe
Or equivalent. Accept answers that are equivalent. eg accept 0.5 as well as $\frac{1}{2}$
[a, b] Accept values between a and b inclusive.
[a, b) Accept values $\mathrm{a} \leq$ value $<\mathrm{b}$
3.14... Accept answers which begin 3.14 eg 3.14, 3.142, 3.1416

Use of brackets It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a student has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the student. In cases where there is no doubt that the answer has come from incorrect working then the student should be penalised.

## Questions which ask students to show working

Instructions on marking will be given but usually marks are not awarded to students who show no working.

## Questions which do not ask students to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Students often copy values from a question incorrectly. If the examiner thinks that the student has made a genuine misread, then only the accuracy marks (A or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that it is clear to the examiner that the student intended it to be a decimal point.

| Q | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 24 | No and correct reason | B1 | eg <br> it will still only take 4 hours <br> it will be the same (time) they could do $48 \mathrm{~m}^{2}$ in that time <br> even though it's twice the area there are twice as many people |  |
|  | Additional Guidance |  |  |  |
|  | No and there are two pe <br> No and it'll be quicker ( <br> No and they'll do $12 \mathrm{~m}^{2}$ <br> No and it'll be the same <br> No and it'll be the same <br> No and it depends on h <br> No and it'll take 6h <br> No and it might take the | take | long (as 8h) | $\begin{aligned} & \mathrm{B} 1 \\ & \mathrm{~B} 1 \\ & \mathrm{~B} 1 \\ & \mathrm{~B} 1 \\ & \mathrm{~B} 0 \\ & \mathrm{BO} \\ & \mathrm{BO} \\ & \mathrm{BO} \end{aligned}$ |

| Question | Answer | Mark |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 25(a) | $5 x-3 x$ or $2 x$ or $3 x-5 x$ or $-2 x$ or 15-6 or 9 or $6-15$ or -9 | M1 | may be seen as an annotation to the given inequality eg -6 written under +15 |  |
|  | $2 x>9$ <br> or $-9>-2 x$ <br> or <br> 4.5 or $\frac{9}{2}$ or $4 \frac{1}{2}$ | A1 | implied by correct answer |  |
|  | $x>4.5$ or $x>\frac{9}{2}$ or $x>4 \frac{1}{2}$ | A1ft | ft solution of inequality of the form $2 x>k$ where $k$ is a number or $m>-2 x$ where $m$ is a number or $a x>9$ where $a$ is an integer not equal to 1 <br> or $-9>b x$ where $b$ is an integer not equal to 1 |  |
|  | Additional Guidance |  |  |  |
|  | In all cases accept the inequality written correctly in reverse order For example, for $2 x>9$ accept $9<2 x$ |  |  |  |
|  | $4.5<x$ |  |  | M1A1A1 |
|  | $2 x>21, x>10.5$ |  |  | M1A0A1ft |
|  | $8 x>9, x>1.125$ |  |  | M1A0A1ft |
|  | Do not allow a correct answer in working followed by an incorrect answer on the answer line eg $x>\frac{9}{2}$ in working with 4.5 on the answer line |  |  | M1A1A0 |
|  | Do not allow the correct answer with another answer eg $x>4.5$ and $x=4.5$ on the answer line |  |  | M1A1A0 |

| Question | Answer | Mark | Comm |  |
| :---: | :---: | :---: | :---: | :---: |
| 25(b) | $2 \leqslant x<5$ or $5>x \geqslant 2$ | B2 | any letter <br> B1 <br> $2 \leqslant x$ or $x \geqslant 2$ <br> or $x<5$ or $5>x$ <br> SC1 <br> $2<x \leqslant 5$ or $5 \geqslant x>$ |  |
|  | Additional Guidance |  |  |  |
|  | $2 \leqslant x$ and $x<5$ |  |  | B1 |
|  | $2 \leqslant x$ and $x>5$ |  |  | B1 |
|  | $2 \leqslant x>5$ |  |  | B1 |
|  | $2 \leqslant x \leqslant 5$ |  |  | B1 |
|  | $2 \leqslant x \leqslant 4$ |  |  | B1 |
|  | $2<x<5$ |  |  | B1 |
|  | $2 \geqslant x>5$ |  |  | B0 |
|  | $2 \leqslant 5$ |  |  | B0 |

|  | Additional Guidance |  |  |

| Question | Answer | Mark |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 27(a) | $2 \times 10^{3} \text { or } 7 \times 10^{4}$ <br> or $140000000$ | M1 | oe correct value not in standard form eg $14 \times 10^{7}$ |  |
|  | $1.4 \times 10^{8}$ | A1 | SC1 Correctly converts an ordinary number with at least four digits to standard form |  |
|  | Additional Guidance |  |  |  |
|  | Condone extra zeros on 1.4 eg $1.40000000 \times 10^{8}$ |  |  | M1A1 |
|  | $1.4 \times 10^{8}$ from 1400000000 |  |  | MOAO |
|  | $2 \times 10^{3}$ is implied by $(2 \times 7) \times\left(10^{3} \times 10^{a}\right)$ <br> $7 \times 10^{4}$ is implied by $(2 \times 7) \times\left(10^{b} \times 10^{4}\right)$ |  |  | M1 |
|  | 1400000000 converted to $1.4 \times 10^{9}$ |  |  | SC1 |

| :---: | :---: | :---: | :---: | :---: |
| 27(b) | $180 \text { or } 0.3$ <br> or $(1.8 \div 3=0.6$ <br> or $\left(10^{2} \div 10^{-1} \Rightarrow 10^{3}\right.$ <br> or <br> calculation which would have the outcome 600 <br> or <br> correct value not given as an ordinary number | M1 | $\text { eg } 1800 \div 3$ $\text { eg } 6 \times 10^{2}$ |  |
|  | 600 | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | $1800 \div 0.3=600$ scores M1 only, as 600 comes from incorrect working |  |  | M1A0 |
|  | $1800 \div 30=600$ scores zero, as 600 comes from incorrect working |  |  | MOAO |

| Question | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 28 | $62 \div 2$ or $62 \times 0.5$ or 31 | M1 | oe eg $62 \div 60 \times 30$ |  |
|  | their 31-25 or 6 | M1 | their 31 must be $>25$ |  |
|  | their $6 \times 3$ or 18 or their $6 \times 4$ or 24 | M1dep | dep on 2nd M1 |  |
|  | 49 | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | 49 from correct working, but a different answer given |  |  | M3A0 |

| 29 | $y=\frac{k}{x}$ | B1 |  |

| Question | Answer | Mark | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 30 | 200 written as a product of factors where at least one factor is prime | M1 | eg <br> 2 and 100 or $2 \times 10^{2}$ or $200 \div 5=40$ <br> may be on a factor tree or repeated division <br> allow one strand to be incorrect if a previous value completes the product <br> eg $10 \times 20$ followed by <br> $5 \times 2 \times 5 \times 6$ implies $5 \times 2 \times 20$ for M1 |  |
|  | 2 and 2 and 2 and 5 and 5 | A1 | may be on a factor tree or repeated division |  |
|  | $2^{3} \times 5^{2}$ or $5^{2} \times 2^{3}$ | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Allow any number of 1 s included as factors up to M1A1 only |  |  |  |
|  | M1 may be awarded for correct work with no or incorrect answer, even if this is seen among multiple attempts |  |  |  |
|  | $1 \times 2^{3} \times 5^{2}$ |  |  | M1A1A0 |
|  | $2^{3} .5^{2}$ or $2^{3} \cdot 5^{2}$ or $2^{3} 5^{2}$ or $2^{3}, 5^{2}$ |  |  | M1A1A1 |
|  | $2+2+2+5+5$ |  |  | M1A1A0 |
|  | $2^{3}+5^{2}$ |  |  | M1A1A0 |
|  | $2 \times 2 \times 2 \times 5 \times 5$ and $2^{3} \times 5^{2}$ on answer line but $2 \times 2 \times 2 \times 5 \times 5=2^{3} \times 5^{2}$ on answer line |  |  | M1A1A0 <br> M1M1A1 |
|  | $2^{3} \times 5^{2}=10^{5}$ |  |  | M1A1A0 |
|  | $2^{3} \times 5^{2}=200$ |  |  | M1A1A1 |
|  | $8 \times 25$ with no prime factorisation |  |  | MOAOAO |

| Question | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| 31 | Alternative method 1 |  |  |
|  | $\sin 30=\frac{x}{10}$ <br> or $(x=) 10 \sin 30$ | M1 | oe eg $\frac{x}{\sin 30}=\frac{10}{\sin 90}$ |
|  | $\sin 30=0.5$ | M1 | oe may be seen in a table $0.5=\frac{x}{10}$ oe scores M1M1 |
|  | 5 | A1 |  |
|  | Alternative method 2 |  |  |
|  | Correct trigonometric method to show that the length of the missing side is $5 \sqrt{3}$ | M1 | oe |
|  | $\sqrt{(5 \sqrt{3})^{2}+x^{2}}=10$ | M1dep | oe |
|  | 5 | A1 |  |
|  |  | itional G | dance |
|  | Accept use of cos 60 instead of sin |  |  |

| Question | Answer | Mark | Comments |
| :---: | :--- | :---: | :--- |
| 35 | $(x+a)(x+b)$ | M1 | where $a+b=7$ or $a b=10$ |
|  | $(x+2)(x+5)$ | A1 |  |
|  | Additional Guidance |  |  |
|  | Ignore attempts to solve their $(x+a)(x+b)=0$ for M1A0 or M1A1 |  |  |
|  | Condone missing final bracket |  |  |
|  | lgnore a check of a correct solution (multiplying out or similar) |  |  |
