

**Q1.** This passage is from a science magazine.

*A star forms when enough dust and gas are pulled together. Masses smaller than a star may also be formed when dust and gas are pulled together.*

(a) What is the force which pulls the dust and gas together?

.....

**(1)**

(b) Complete the sentences.

(i) The smaller masses may be attracted by the star and become

.....

**(1)**

(ii) Our nearest star, the Sun, is stable because the gravitational forces  
and the radiation pressure are .....

**(1)**

(iii) The Sun is one of billions of stars in the galaxy called the

.....

**(1)**

**(Total 4 marks)**

**Q2.** (a) Complete the **two** spaces in the sentence.

Stars form when enough ..... and gas from .....  
are

pulled together by gravitational attraction.

(2)

(b) How are stars able to give out energy for millions of years?

Put a tick (✓) next to the answer.

By atoms joining together

By atoms splitting apart

By burning gases

(1)

(c) There are many billions of stars in our galaxy. Our Sun is one of these stars. What is the name of our galaxy?

.....

(1)

(d)

**Why was the Universe created?**

We cannot expect scientists to answer this question. What is the reason for this?

Put a tick (✓) next to the reason.

It will take too long to collect the scientific evidence.

The answer depends on beliefs and opinions, not scientific evidence.

There is not enough scientific evidence.

(1)  
(Total 5 marks)

**Q3.** Nuclear power stations use the energy released from nuclear fuels to generate electricity.

(a) Which substance do the majority of nuclear reactors use as fuel?

Draw a ring around your answer.

**plutonium-239**

**thorium-232**

**uranium-235**

(1)

(b) Energy is released from nuclear fuels by the process of nuclear fission.

Describe what happens to the nucleus of an atom during nuclear fission.

.....  
.....  
.....  
.....

(2)

(c) Use words from the box to complete each sentence.

<b>condenser</b>	<b>gas</b>	<b>generator</b>	<b>reactor</b>	<b>steam</b>	<b>turbine</b>
------------------	------------	------------------	----------------	--------------	----------------

The energy released from the nuclear fuel is used to heat water. The water turns into

..... and this is used to drive a  
.....

This turns a ..... to produce electricity.

**(3)**  
**(Total 6 marks)**

**Q4.** Four different processes are described in **List A**. The names of these processes are given in **List B**.

Draw a line to link each description in **List A** to its correct name in **List B**.  
Draw only **four** lines.

**List A**

the nuclei of two atoms  
joining together

the nucleus of an atom  
splitting into several pieces

an atom losing an electron

an electric charge moving  
through a metal

**List B**

gamma emission

electric current

ionisation

nuclear fission

nuclear fusion

**(Total 4 marks)**

Q5. (a) The diagram shows the lifecycle of a star.

(i) Use words or phrases from the box to complete the sentences contained in the diagram.

black dwarf	black hole	protostar	red giant
-------------	------------	-----------	-----------

(3)

(ii) The table compares the approximate size of three stars with the size of the Sun.

Star	Size
Alpha Centauri A	the same as the Sun
Betelgeuse	1120 times bigger than the Sun
Cephei	1520 times bigger than the Sun

Which **one** of these three stars has the lifecycle shown in part (a)(i)?

.....  
Give a reason for your answer.

.....  
.....

(2)

(b) Which one of the following describes the process by which energy is given out in stars?

Tick (✓) **one** box.

Atomic nuclei inside the star join together.

Atomic nuclei inside the star split apart.

Gases inside the star burn.

(1)  
(Total 6 marks)

**Q6.** The names of three different processes are given in **List A**.  
Where these processes happen is given in **List B**.

Draw a line to link each process in **List A** to where the process happens in **List B**.

Draw only **three** lines.

**List A**

style='height:1.1pt'>  
**Process**

fusion

chain reaction

alpha decay

**List B**

**Where it happens**

in a star

in a nuclear reactor

in a smoke precipitator

in the nucleus of an atom

**(Total 3 marks)**
